Euclid Stencil, pretty sliced up

Euclid Stencil may be seen as an ironic comment on the undiminished popularity of stencil fonts in the digital age. The placement of bridges doesn't follow the conventional pattern determined by the requirements for making physical stencils. Instead, the slicing occurs wherever it yields visually compelling results: Mosaics of shards, miniatures of modularity. Gaps are applied vertically and horizontally, sometimes emphasizing symmetry (E, H), but most often diagonally, at opposing angles (R, X). A spin-off of Euclid Stencil, it's the typographic equivalent of Vincent Cassel doing the Laser Dance.
