## File Formats

Available desktop font formats: OpenType/CFF (.otf extension), TrueType (.ttf extension on request)

We offer WebS, WebM and WebXL webfont files subsets – you will find them all in your package:

- WebS is a reduced and lighter font file suitable for most common web usages, containing only the Latin alphabet (without alternates, ligatures and OpenType features).
- WebM is the WebS subset (without alternates, ligatures and OpenType features).
- WebXL is the complete font file containing all characters and languages including the many available only with OpenType functions and therefore not fully supported by all web browsers.

Available webfonts formats: .woff2, .woff, .eot, .ttf, .svg

The webfonts are manually optimized for ClearType rasterizers and above (DirectWrite), using TrueType hinting in vertical directions.

Available formats for App, EPUB, Broadcasting OpenType/CFF (.OTF extension)
